

ABSTRACT

This invention relates to a vehicle load area liner
5 comprising a sheet foldable to form a receptacle having a
base and a wall around the base, the receptacle being
arrangable in use to be mounted in the load area of a
vehicle, and wherein at least a portion of the wall of the
receptacle is unfoldable to provide a flap able to mask
10 the threshold of the load area, when the vehicle load area
is open, in use. The invention further provides a method
of protecting a vehicle load area comprising the steps of:

- (a) providing a liner of the invention; and in any order;
- 15 (b) folding a liner to form a receptacle; and
- (c) mounting the liner on the floor of the vehicle load
area.
